Technical Skills

JavaScript • React • React Native • Vue • Node • Express • jQuery • Python • Django • MongoDB • PostgreSQL • Sass • Less • CSS3 • HTML5 • Materialize • Bootstrap • Mocha • Chai • Git • GitHub

Education

General Assembly, Seattle, WA *May 2018 - Aug 2018*
Focus: Web Development
Coursework: Four large projects developed and presented in an Agile environment. Extensive study of JavaScript, frontend and backend languages and frameworks, RESTful APIs and CRUD operations, data structures and algorithms, Big O Notation, and an introduction to cloud computing.

Ohio State University, Columbus, OH *Sept 2007 - June 2009*
Major: English with Pre-Ed specialization, B.A.
Minor: Music
GPA: 3.6 *(Cum Laude)*

Projects

Lo Wolf Music - *Vue • Node • Express • Sass • PostgreSQL • Sequelize • Stripe API*
• Developed a full stack eCommerce website for songwriter Lo Wolf, with RESTful backend which allows followers to rsvp to shows, preview and purchase music and subscribe to an email list.
• Utilized bcrypt and JSON web token authentication to secure an admin page for the artist to view transactions, add shows and track new subscribers.

Bookkeeper - *React Native • Redux • Node • Express • PostgreSQL • Sequelize • Google Books API*
• Designed and created a social networking application for finding or creating online book clubs, discovering what other users are currently reading, and organizing notes.
• Developed RESTful backend as well as Many to Many and One to Many relationships for efficient storage and querying of user and club data.

Goodmarket - *Python • Django • JavaScript • CSS3 • PostgreSQL • Stripe API*
• Developed a full stack eCommerce application which allows users donate a portion of each sale to an organization of their choosing.
• Integrated with Stripe's connect API to distribute funds to multiple vendors through a single purchase, with appropriate percentages removed and stored in a Charity model.
• Created a marketplace where sellers can list, tag and describe their items, and buyers can filter their search by clicking category filters or entering a search term.

Musaic - *React • Node • Express • MongoDB • CSS3 • MaterialUI • Spotify API • Cloudinary API*
• Created a MERN stack application which allows users to create Spotify playlists based on the mood of uploaded photographs.
• Wrote a complex algorithm which converts HSL colors to mood attributes for interpretation by the Spotify API.
• Utilized OAuth to allow users to open playlists in Spotify for immediate listening.

Work Experience

Vortex Doughnuts - *Asheville, NC*   **Barista,** *Jul 2015 - Dec 2016*
• Met with farmers in Brazil to advise on new coffees and maintain direct trade relationships.
• Organized weekly community cuppings, trained new employees, managed and supplied content for social media accounts with nearly 20,000 followers.
• Sourced, prepared and served specialty coffee from sustainable, direct trade farms all over the world to thousands of Asheville residents.

Denver Public Schools - *Denver, CO*   **Guest Teacher,** *Feb 2011 - Jun 2012*
• Filled in for absent K-12 teachers in more than 20 of Denver's inner city schools, including Montessori, special needs, remedial, and Spanish speaking classrooms.
• Developed lesson plans for multi-day substitutions, or implemented existing plans.

Americorps NCCC - *Denver, CO*   **Corps Member,** *Sept 2009 - Aug 2010*
• Coordinated large groups of volunteers building houses for Habitat for Humanity.
• Cleared flooded homes and provided emergency resource information for natural disaster victims.
• Assisted teachers in an understaffed inner city elementary school.
• Built and maintained over 15 miles of trails in national and state parks.
